 29 zł	 35 zł	 59 zł	 389 zł	 69 zł	 229 zł
 219 zł	 1 050 zł	 449 zł	 89 zł	 59 zł	 399 zł

Business model

- 5¢ per click
- 5\$ per order
- 5% of order value

(And we pay for each impression.)

Data structure

- User's previous interactions with the advertiser's website
 - Recent impressions and clicks
 - Ad/bid context

Event types

Home

Product

Listing

Basket

Order

[..]

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

(Click-Through Rate)

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

(Conversion Rate)

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

(Conversion Value)

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * \mathbf{5\%}$$

(% of order value)

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

Estimated
impression
value

Basic model

$$\text{bid} = \alpha * \text{CTR} * \text{CR} * \text{CV} * 5\%$$

(roughly: 1 - margin)

Second-price auctions

Second-price auctions

Truthful bidder is the best bidder

(Vickrey's theorem)

But...

1. We never know the real impression value. **We just estimate...**

news.com

2000 imps

60 clicks

3% CTR

bid = **\$0.03**

sport.news.com

1000 imps

50 clicks

5% CTR

bid = \$0.05

moto.news.com

1000 imps

10 clicks

1% CTR

bid = \$0.01

sport.news.com

1000 imps
50 clicks
5% CTR

bid = \$0.05

moto.news.com

1000 imps
10 clicks
1% CTR

bid = \$0.01

(our bid = \$0.03)

But...

2. There will be more auctions. **We may buy later, cheaper...**

End-to-end

Preselecting → Scoring → Composition

End-to-end

Preselecting → Scoring → Composition

e.g.

Deep Neural Networks for YouTube Recommendations

Paul Covington, Jay Adams, Emre Sargin

It's all about targets!

Too implicit: what item user will **view** next?

Too explicit: how will user **rank** this item?

Pretty good: will user **buy** this item?

Typical: will user **click** this item?

Click-baits

How do you sell a wood splitter on ebay?

UNACCEPTABLE!

Story

Item has high CTR

Model thinks it's good

Item becomes more popular

Model thinks it's very good

Item makes it to the top 10

Model thinks it's great

Item is now No. 1
